Kevin J Martin  
Chair, Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Kevin Martin:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It's in the public interest because it will make us safer and more competitive, it will create equal opportunity, and it will improve our great country.

Please support M2Z today.

Sincerely,

Hector D. Trestini

id like to add personal coment,  
as being disabled and a somewhat shut in , i depend on internet as much as  
if not more internet. i use to contact outside co much more effective,  
jobs shopping . education is also a big thing if we want to survive in  
this modern world. the internet can provide us with the internet to  
achive the things i mentioned not to mention finacial burdan it could  
cause in the way people have a right to internet acess with out having to  
shell out money spent elsewhere. well please pass bill thank u,

Dear Robert McDowell:

Dear Senator, House Representative & Commissioner!

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Your help is much appreciated

Sincerely,

Alwin G. Ostner

It's in the public interest because it will make us safer and more competitive, it will create equal opportunity, and it will improve our great country.

Don't deprive those with limited income or resource to stay behind. They deserve the same consideration and access as anyone else.

Beside M2Z would be doing just like local TV, which every one is privy. They want to operate in the same way. Ads would fuel their expense to operate. If other broadband companies lobby to stop M2Z from offering service to the less privilege it would be because of their obviously greed and concern to their shareholders. Well they had the same opportunity to offer this service.

Like Star Trek, let M2Z Network go where no man has gone before. Approve their support for the nation communities, schools and libraries by offering family friendly Internet access to all.

Please support M2Z today.

Sincerely,

Livia Landersjonez
